RE: Election of Final SO₂ Emission Limits for the FCCU

United States, et al. v. Coffeyville Resources Refining & Marketing, LLC (CRRM), Case No. 6:04-CV-01064-KMH

Coffeyville Resources Refining & Marketing, LLC · P.O. Box 1566 · Coffeyville, KS 67337 Phone: 620.2521.4601 · Fax: 620.252.4567

Dear Recipients:

In accordance with paragraph 21 of the Second Consent Decree, as modified by Second Material Modification to the Second Consent Decree, CRRM is providing notice that it is selecting the 15/30 Final SO₂ Emissions Limits in paragraph 20.a., and will begin meeting the 365-day limit on August 1, 2016 and the 7-day limit on July 25, 2017.

Thank you for the opportunity to reassess the refinery's ability to meet the $15/30~SO_2$ emissions limits without installing a wet gas scrubber. Through a series of projects to optimize operations of the FCCU, the company has been able to significantly reduce SO2 emissions and meet the lower limits. In doing so, the company will be conserving energy that would have been consumed operating a wet gas scrubber and avoiding discharges of dissolved solids to the Verdigris River.

Please let me know if you have any questions.

Very truly yours,

Darin L. Rains
